## Fishery Crisis the Focus of Private Members Bill

The MHA for the Straits-White Bay North will table a private members motion in the House of Assembly tomorrow to address what he describes as a serious gap in government's response to the fishery crisis. Marshall Dean's motion calls on the House to encourage government to launch an interim strategy and action plan that would deal with the fall-out from fishery restructuring leading up to the implementation of the MOU agreement and proposals. Dean says the motion highlights calls for interim compensation and support for those who have spent their lives in the fishing industry, and are now being "rationalized" through the back door.
