Fisheries Critic Meets with OCI Workers

Liberal Fisheries critic Jim Bennett came out today in support of displaced workers at the OCI fish plant in Marystown. Bennett addressed a small group outside the plant gate this morning saying he fully supports their stand. He is calling on the provincial government to take back the plant from OCI, because he says they have breached their agreement, signed a little over four years ago.

Burin-Placentia West MHA Clyde Jackman says that's easy for Bennett to say but he says it's not quite so simple.
